

ELL INSTRUCTIONAL TRAINING VIDEOS

Mathematics

The ELL instructional videos provide segments of teachers demonstrating strategies from each area— affective, linguistic, and cognitive—in authentic classroom settings. These professional development videos highlight specific cognitive, linguistic, and affective teaching strategies that use language as the means through which content is taught.

Affective Learning Environment Playlist

Think about:

How did the graphic organizer assist ELLs?

How did the sentence frames/stems encourage the use of complete sentences in the classroom?

Linguistic Learning Environment Playlist

Think about:

How did the language objective encourage the use of academic language?

How did the teacher facilitate the Frayer model activity to encourage speaking in the classroom?

Cognitive Learning Environment Playlist

Think about:

How did the use of manipulatives help ELLs in the learning environment?

How did ELLs use academic vocabulary during the classroom discussion?
