

## ELL INSTRUCTIONAL TRAINING VIDEOS

### Science

The ELL instructional videos provide segments of teachers demonstrating strategies from each area— affective, linguistic, and cognitive—in authentic classroom settings. These professional development videos highlight specific cognitive, linguistic, and affective teaching strategies that use language as the means through which content is taught.

#### Affective Learning Environment Playlist

*Think about:*

What was the purpose of providing ELLs with sentence frames/stems?

What was the relationship between meeting the affective needs of ELLs and academic performance?

#### Linguistic Learning Environment Playlist

*Think about:*

What considerations did the teacher take into account when planning instruction to meet the linguistic needs of ELLs?

How did the instructional activity build background knowledge?

#### Cognitive Learning Environment Playlist

*Think about:*

How did the use of technology encourage student interaction?

How did realia such as real-life and concrete objects create opportunities for ELLs to acquire academic vocabulary?
